About me...

First: I'm an italian architect: *"A technical man with a good taste!"*

Second: I'm lucky, because usually, I work only with "very special people".

Third: Let's go to work! I don't like wasting time!

More...

I'm married to Benedetta and we have 2 children (Teresa 10yo and Lorenzo 14 yo);

I don't have any problem to work around the world.

I speak Italian (native), English (intermediate), French & Russian (basic).

I use VectorWorks to drawing in 2D and all most popular software to write, to calculate etc.

What can I do for you?

I can help you to make true your wishes; to design the best for you and for your flat or villa or palace or castle or...more.

I can assist you with competence, taste and professionally -from start to finish- to reach the target.
